

## **Professional Summary**

Dedicated and detail-oriented Program Analyst ,worked as React developer with around 2.7 years of experience having skills in Html ,Css ,Javascript ,React.js ,Next.js,Node.js ,Mongo.db and Sql and is always ready to grasp new technologies and work on them.In my I worked on several components, including creating dynamic pages such as the landing page for the website, fixing major bugs, and developing a manufacturing page where sellers could list their products. Additionally, I designed and implemented filters for the manufacturing page to enhance usability.

## **Experience**

### **Power Cozmo || React/Next Developer**

**Sept 2024 to Dec 2024**

- Developed Next.js pages and worked Redux toolkit, reducing codebase and improving maintainability.
- Created Landing , Manufacture, Survey page ,Browsing History and ChatBox for the project with signup and filter system.
- Integrated RESTful APIs to enhance application functionality, utilizing optimized endpoints to improve data retrieval speed with use of local storage

### **Cognizant Technology Solutions || Program Analyst**

**Feb 2022 - June 2024**

- Developed React components using functional components and DOM manipulation and Redux toolkit, reducing codebase and improving maintainability.
- Improved code through the use of advanced JavaScript techniques and best practices.
- Implemented Node.js and MongoDB for backend development, optimizing data management

### **Airtel || Intern**

**Jan 2020 - June 2020**

- Trained in CCNA, enhancing network troubleshooting skills

### **Innolabz Software || Engineer Intern**

**Feb 2021 - Aug 2021**

- Developed software integrations using Arduino IDE, successfully bridging hardware and software components, resulting in a 50% increase in system efficiency.
- Wrote code to ensure integration of hardware and software systems, reducing integration issues by 40%.

## **Education**

Chitkara University Institute Of Engineering & Technology || Bachelor's Of Engineering (ECE) || Completed in 2020

## **Skills**

**Technical Skills:** HTML, CSS, JavaScript, TypeScript, React.js, Redux Toolkit, Bootstrap, Angular,SQL, Node.js,MongoDB,Git and Github

**Soft Skills:** Observation, Decision making, Communication, Multi-tasking, Empathy

## **Certifications/Courses**

The Complete Javascript Course :From zero to expert

## **Projects**

- **Ecommerce** : I worked on an e-commerce app designed for B2B businesses, providing a platform where sellers and buyers could connect. My contributions included creating the landing page, the manufacturing page, and a retargeting page featuring a search bar and various sections. I integrated multiple APIs and designed dynamic pages to ensure seamless functionality. On the manufacturing page, I implemented advanced filters to display products based on user preferences, and I also designed the wishlist page to enhance user engagement.
- **Login and Registration Page:** Designed a login system with social login options and secure user management using React.js with Yup validations
- **Weather Website:** Created a weather forecasting application with geolocation features and interactive UI using

React.js and OpenWeatherMap API.

- **Notes Creation Website:** Developed a notes management system using the MERN stack with user authentication.
- **News Website with API Integration:** Built a dynamic news website using React.js integrating multiple news APIs for real-time updates.
- **Personal Projects:** Worked on various projects including a task management app showcasing proficiency in JSON Web Token (JWT) implementation.
